Scheduling Manual

This document contains the complete instructions for using the scheduling modules in Tournament Data Manager. It includes all of the necessary pieces needed to complete manual scheduling and auto scheduling.

Step 1: Events

The screenshot shows the 'TDM - Events' application window. The title bar reads 'TDM - Events'. The menu bar includes 'File', 'Edit', 'View', 'Player', 'Tools', 'Reports', and 'Help'. The toolbar contains icons for Home, Events, Groups, Draws, Site/Courts, Schedule Planning, Scheduling, Check In List, and Tournament Desk. The main window title is 'Tournament: Millennium Sportsclub Junior Cup Open (500002003)'. Below the title, there are buttons for 'Create Event', 'Edit Event', 'Delete Event', and 'Split Event', along with the text 'Total Number of Players: 344'. A table lists various events with columns for Event Name, Players, Draw Type, Draw Made, Draw Size, Level, Division, Surface, Entry Limit, and Fee. Below the table, there are two panes: 'Players' and 'Alternates'. The 'Players' pane contains a list of 30 player names. The 'Alternates' pane is currently empty. At the bottom of the player panes are buttons for 'Add Player', 'Edit Player', 'Remove Player(s)', 'Auto Seed', and 'Manual Seed'. The status bar at the bottom of the window displays 'Millennium Sportsclub Junior Cup Open (500002003)', 'Updated 3/4/2003 11:40:01 AM (Pacific Time)', '500002003', 'Thomas March', and 'Connected'.

Event Name	Players	Draw Type	Draw Made	Draw Size	Level	Division	Surface	Entry Limit	Fee
Boys' 10 Doubles	0	Unknown	No			Boys' 10 Doubles			\$0.00
Boys' 10 Singles	22	Single Elimination	Yes	32		Boys' 10 Singles			\$0.00
Boys' 12 Doubles	2	Unknown	No			Boys' 12 Doubles			\$0.00
Boys' 12 Singles	41	Unknown	No			Boys' 12 Singles			\$0.00
Boys' 14 Doubles	4	Unknown	No			Boys' 14 Doubles			\$0.00

Status Bar: Millennium Sportsclub Junior Cup Open (500002003) | Updated 3/4/2003 11:40:01 AM (Pacific Time) | 500002003 | Thomas March | Connected

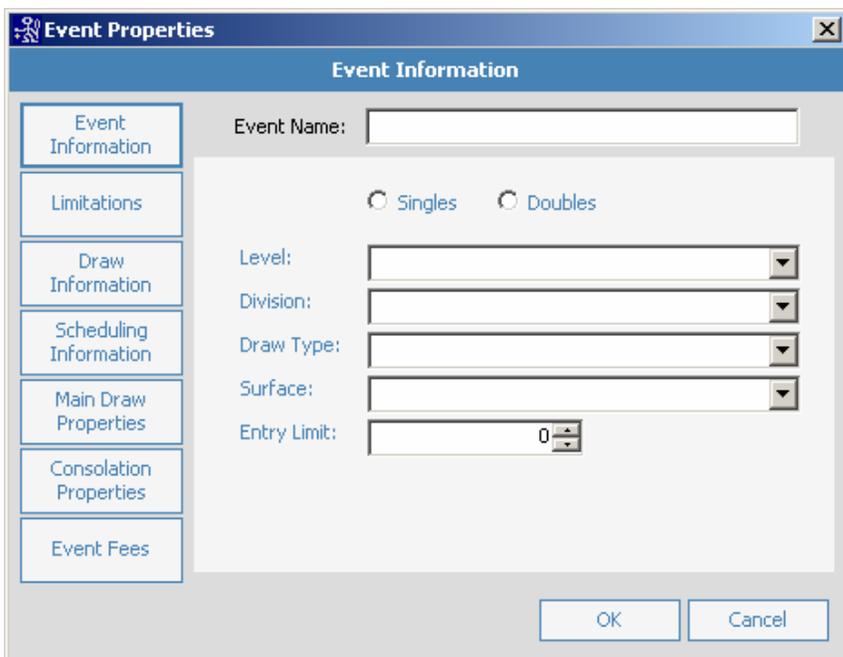

In order to begin the scheduling process, there are important components of Events that need to be defined.

The **Events Icon** lists the Events and the properties of those events. It also lists the players associated with each event. If there are any **alternates** for this tournament, they will show in the alternates' box at the lower right corner of the events screen.

Since this is a Windows based application, most Windows features are available. If the **sort order** of the events is not correct, you can click on the column heading to sort in another order. This feature works throughout TDM.

Edit Event

To **edit an event**, you can double-click on the event name or you can highlight the event name and then click on **Edit Event**. The Event properties box will open. If this is a sanctioned tournament and was downloaded from the Online Sanction form, the Event Information properties have pre-filled with the same information as the Online Sanction form. One of the most important things to indicate under edit event is the **draw type**. The system cannot make a draw until a draw type is defined.

The **Event Name** at the top of the Event Properties box can be edited to reflect your specific tournament such as Boys 18 singles Gold.

The **Level** drop-down has the following options:

Ranked	Novice
Unranked	Senior
Championships	Super Senior
Super Champs	Grand Prix
Challenger 1	Masters
Challenger 2	Satellite
Challenger 3	State

The **Division** drop down contains all divisions such as Junior, Adult, Family, NTRP and Custom. A division **MUST** be defined for each event.

The **Draw type** contains the following options: A draw type **MUST** be defined in order to make a draw for this event.

- | | |
|---------------------------------------|---------------------------------------|
| Single Elimination | Unknown |
| Round Robin | Compass Draw |
| Full Feed-in Consolation (through QF) | Team Competition |
| First Round Losers Consolation | Team (60/60) |
| First Match Losers Consolation | Team (80/80) |
| Curtis Consolation | Full Feed-in Consolation (through SF) |

The **Surface and Draw limits** can also be indicated here.

Draw Information:

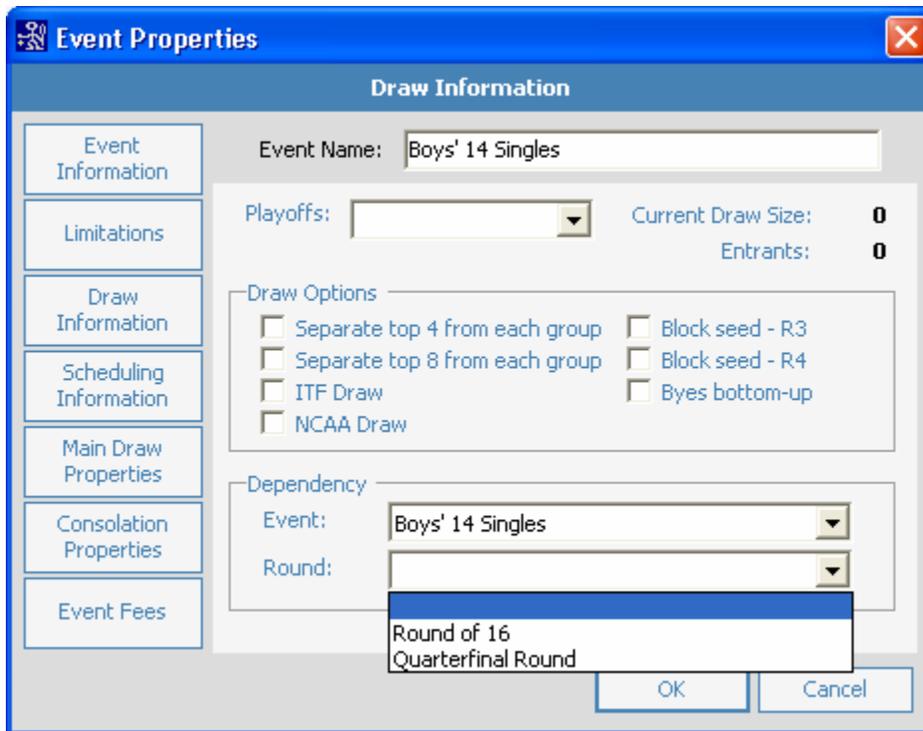

The screenshot shows the 'Event Properties' dialog box with the 'Draw Information' tab selected. The dialog has a sidebar on the left with buttons for 'Event Information', 'Limitations', 'Draw Information', 'Scheduling Information', 'Main Draw Properties', 'Consolation Properties', and 'Event Fees'. The main area contains the following fields and options:

- Event Name:** A text input field.
- Playoffs:** A dropdown menu.
- Current Draw Size:** A numeric field set to 0.
- Entrants:** A numeric field set to 0.
- Draw Options:** A group box containing several checkboxes:
 - Separate top 4 from each group
 - Separate top 8 from each group
 - ITF Draw
 - NCAA Draw
 - Block seed - R3
 - Block seed - R4
 - Byes bottom-up
- Dependency:** A group box containing two dropdown menus:
 - Event:** A dropdown menu.
 - Round:** A dropdown menu.

At the bottom right of the dialog are 'OK' and 'Cancel' buttons.

The **Draw information** screen lets you indicate all the options that will be taken into consideration when making the draw:

- The **Playoff** options include None, Top 4 and Top 8.
 - **Top 4** is used for a Third Place Playoff - the losing semi-finalists in the main draw play-off for Third and Fourth Place in the tournament.
 - **Top 8** is used for Seventh Place Playoff – the losing semi-finalists in the consolation play-off for Seventh and Eighth place in the tournament.
- The **Separate top 4** and **Separate top 8** allow you to specify the top players in a particular group. These players are then separated into different quarters of the draw. For instance, if you choose Separate top 4, you would then go to groups and create the groups that will allow you to separate the players, such as by Section. From this group, you would click on the player name and then number the player by rank.
- The **ITF** and **NCAA** are draws specific to these two organizations.
- The **'Byes Bottom up'** feature first assigns byes to the seeded players in descending order. The remaining byes are placed at the extremes, the top and the bottom. The first bye goes on the first available odd-numbered line above the bottom line; the second on the first available even numbered line below the top line, etc. Once the seeded players and the byes have been assigned, the rest of the draw is filled in with the remaining players being placed on the unoccupied lines in random order.

TDM has the ability to create consolation rounds for those players that lose in a particular round of the Main Draw. This event is considered a **Dependent Draw**.

To create this type of consolation round:

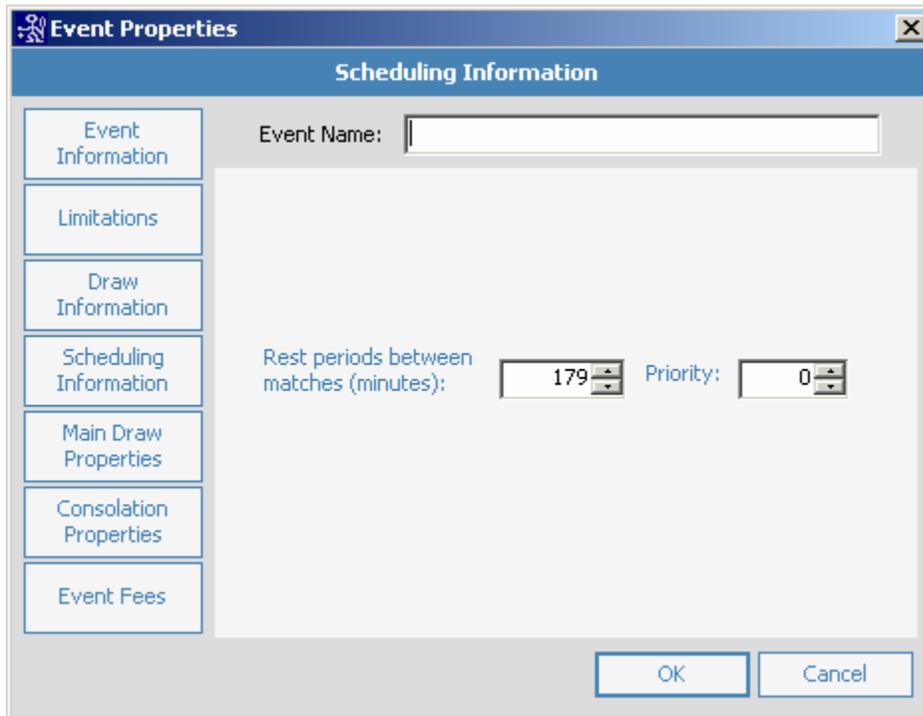

1. Be sure that the draw is made for the Main Event.
2. Click on Create New event
3. Choose the division, (Example: Boys 14 singles) on the Events properties screen
4. On the Draw properties, make it dependent on the Main Event – Boy's 14 Singles
5. Select the main draw round from which the players that lose will feed into this new consolation.
6. The name of the event must be filled in and must be different than the name of the main event that this consolation is dependent on.
7. The draw type of the dependent event will always be single elimination.

Block Seed R-3 and Block Seed R-4 refer to the practice of taking the seeded players and advancing them several rounds into the tournament.

- **Block seed R-3** places the selected players directly into the Third round. This can vary depending on the size of the draw. For instance, in a draw of 64, it would put the block-seeded players feeding into the round of 16.
- **Block seed R-4** places the selected players directly into the Fourth round. Again, this can vary depending on the size of the draw.

Scheduling Information

Scheduling Information: This component is crucial for auto scheduling. However, for most tournaments the defaults that are set up work just fine.

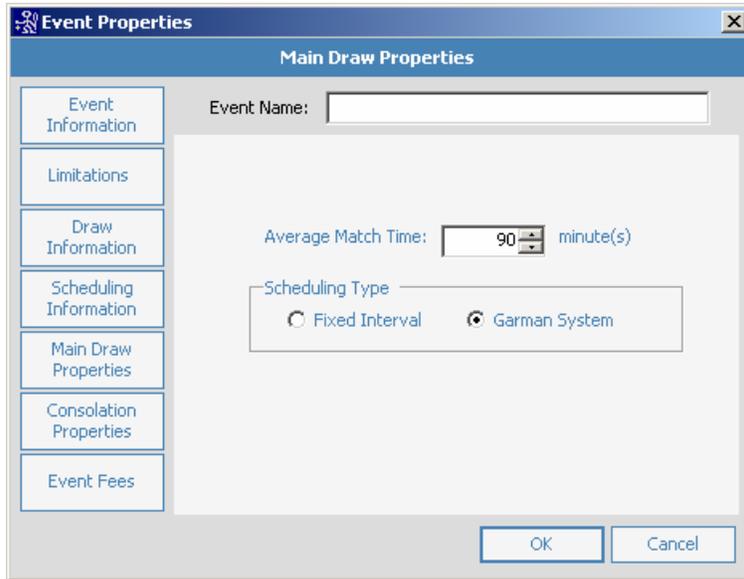

The screenshot shows a software window titled "Event Properties" with a sub-tab "Scheduling Information". On the left side, there is a vertical menu with buttons for "Event Information", "Limitations", "Draw Information", "Scheduling Information" (which is selected), "Main Draw Properties", "Consolation Properties", and "Event Fees". The main area of the dialog contains an "Event Name:" text box at the top. Below it, there are two spinners: "Rest periods between matches (minutes):" set to 179 and "Priority:" set to 0. At the bottom right, there are "OK" and "Cancel" buttons.

The **Scheduling Information** screen indicates the minimum **Rest period**. The rest period is the time between the start of the first match and the time of the second match. This is the sum of the actual match time and the rest time. It defaults to 3 hours or 179 minutes of rest.

This Rest Period indicates that the system, when using the auto-scheduling feature, will allow 3 hours from the start of one match to the start of the next match for an individual player.

179 Minutes is typically the rest period used for Best 2 out of 3 sets. If you are using a different scoring format, you can adjust the time accordingly.

Average match time for Main Draw and Consolation Properties:

The screenshot shows the 'Event Properties' dialog box with the 'Main Draw Properties' tab selected. The 'Event Name' field is empty. The 'Average Match Time' is set to 90 minutes. The 'Scheduling Type' is set to 'Garman System'.

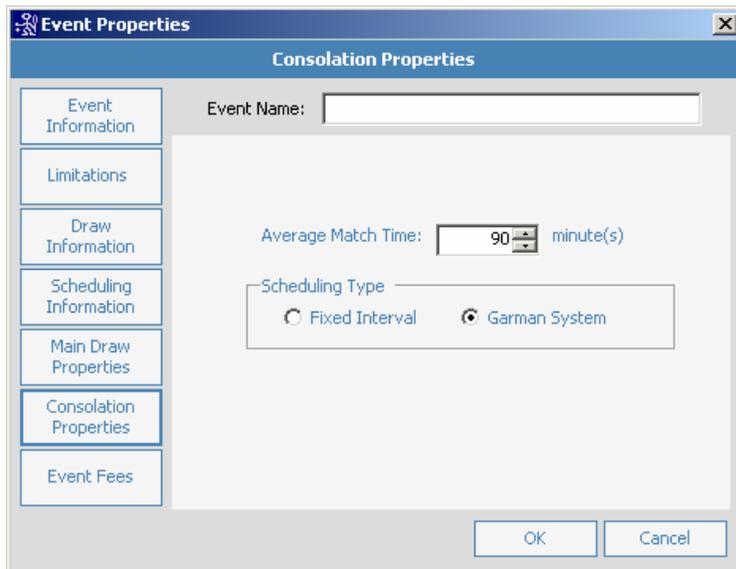

Tab	Event Name	Average Match Time	Scheduling Type
Event Information		90	Garman System
Limitations			
Draw Information			
Scheduling Information			
Main Draw Properties		90	Garman System
Consolation Properties			
Event Fees			

Main Draw Properties

The **Main Draw Properties** screen can be used for Fixed Interval scheduling or Garman System Scheduling.

The system defaults to 1 Hour - 30 Minute match time (average) using the **Garman System** of scheduling.

To use **Fixed Interval** scheduling, simply change the selection to Fixed Interval.

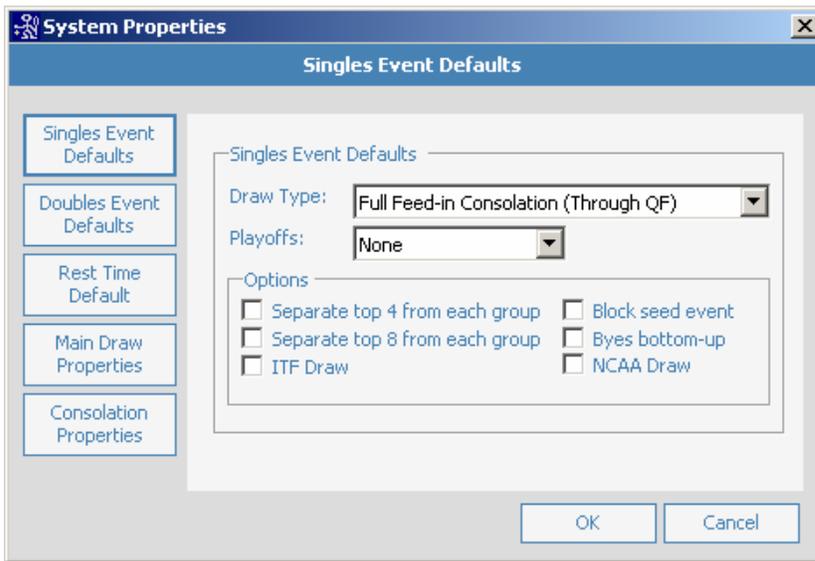

The screenshot shows the 'Event Properties' dialog box with the 'Consolation Properties' tab selected. The 'Event Name' field is empty. The 'Average Match Time' is set to 90 minutes. The 'Scheduling Type' is set to 'Garman System'.

Tab	Event Name	Average Match Time	Scheduling Type
Event Information		90	Garman System
Limitations			
Draw Information			
Scheduling Information			
Main Draw Properties			
Consolation Properties		90	Garman System
Event Fees			

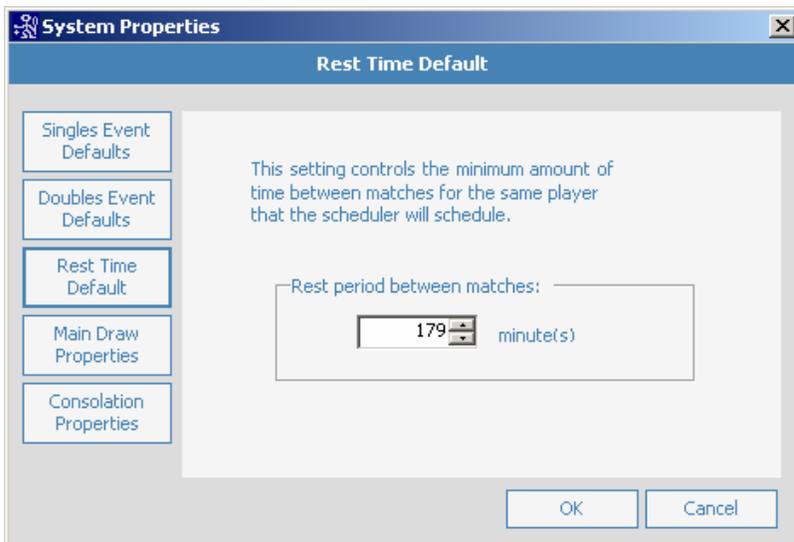

The **Consolation Properties** Screen is used to indicate the Average Match time and Scheduling type for the consolation rounds and looks exactly like the Main Draw properties screen.

If the consolation round is using a short scoring format, the average match time should be adjusted.

The **System property defaults** can be edited to reflect the preferences of the tournament director. The defaults will be applied to every tournament when it is added to TDM.

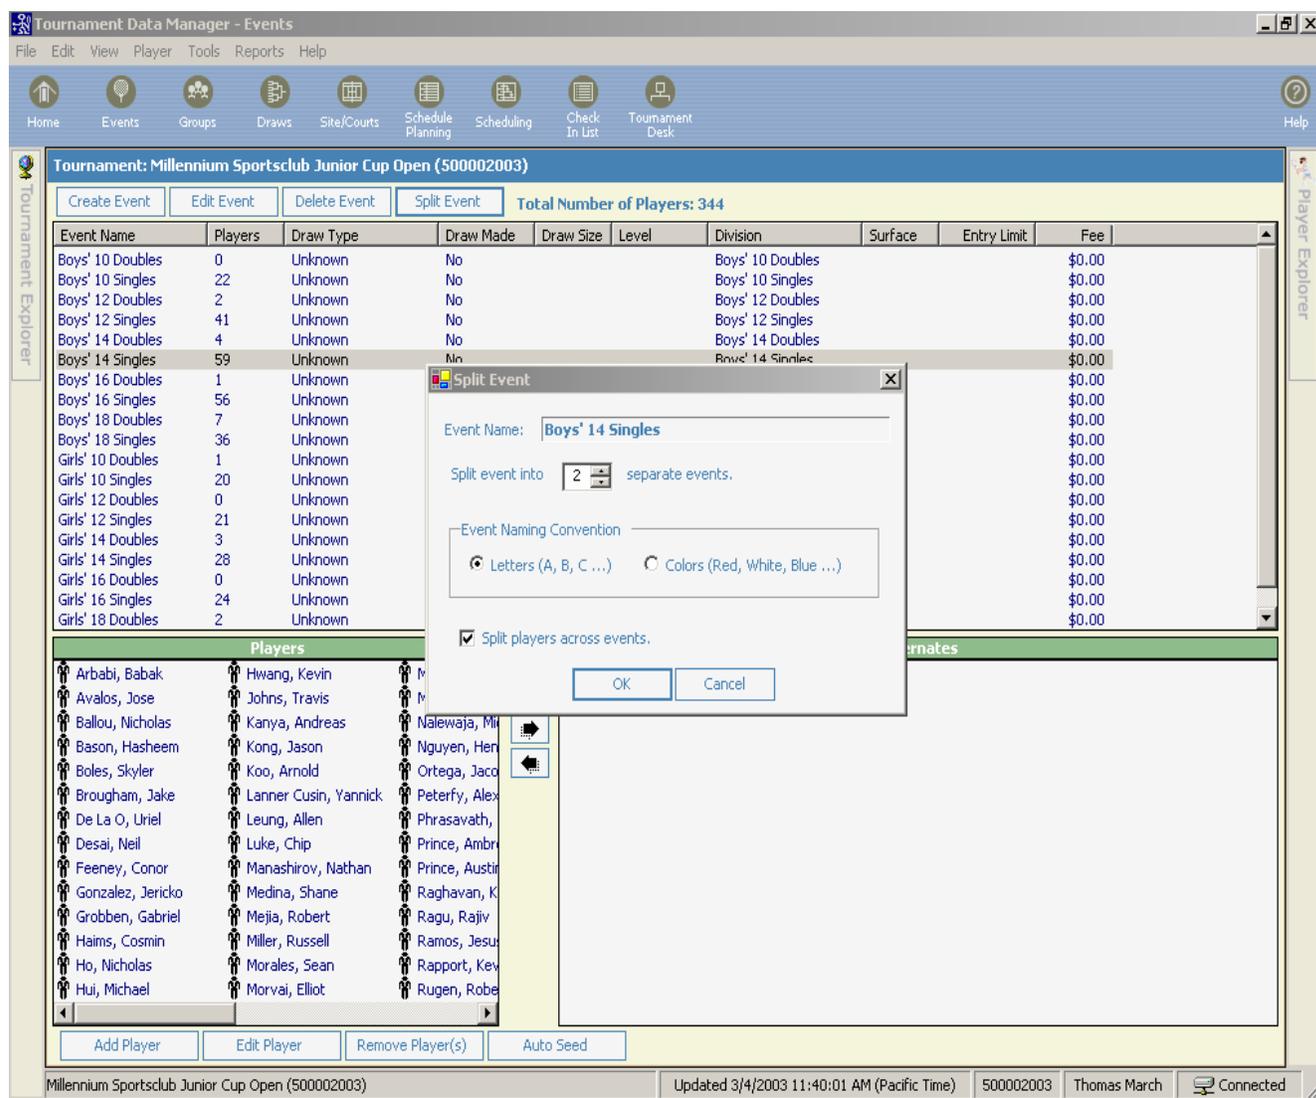

To edit these defaults, simply click on **Tools** Then **System Properties** The **Event Defaults** for all tournaments can be indicated here. You can indicate defaults for all singles events and defaults for all doubles events. The draw type must be specified for each event in order for the system to generate the draw. This too can be defined in the system properties as a default.

The defaults for Minimum rest time can be indicated on the **Rest Time Default** Screen. The defaults for the Main Draw properties are indicated here. The same defaults can be shown for the Consolation draw properties.

Splitting Events:

A feature in TDM is the ability to **Split Events**. From the events screen, click on the event and then Split Event.

- You can indicate how many events to split this particular group.
- You can indicate the **Event Naming convention** as either Letters or Colors. These names can also be changed once the process of splitting the events is complete.
- The option that is checked, **Split players across events**, is the default. With this checked, the system will not only create separate events the same as the initial event, but will split the players across each of these events, as evenly as possible. If you manually want to move the players, you would simply uncheck this box and then you will have the option to drag and drop them to the correct event.

Adding Avoidances:

When using auto scheduling, TDM will take all avoidances into consideration when scheduling the match times.

The screenshot shows a software window titled "Player Properties" with a sub-tab "Avoidance". On the left, there are four tabs: "General", "Event & Match Information", "Avoidance" (which is selected), and "Entry Status". The main area contains the following fields:

- Player Name: Jonathan R Sievers
- Tournament Day: 0
- Do not schedule this player between: 09:00 AM and 05:00 PM

Below these fields is a table with the following headers: Day, Date, Begin, End. The table is currently empty. To the right of the table are two buttons: "Add" and "Remove". At the bottom of the dialog are "OK" and "Cancel" buttons.

If you allow **Avoidances**, you can indicate them here.

You can indicate the day of the avoidance, edit the time and then click on Add. This will prevent the system from scheduling this player during that time.

Step 2: Sites and Courts

In the **Site/Courts** area of TDM, you can indicate what facilities will be used in your tournament.

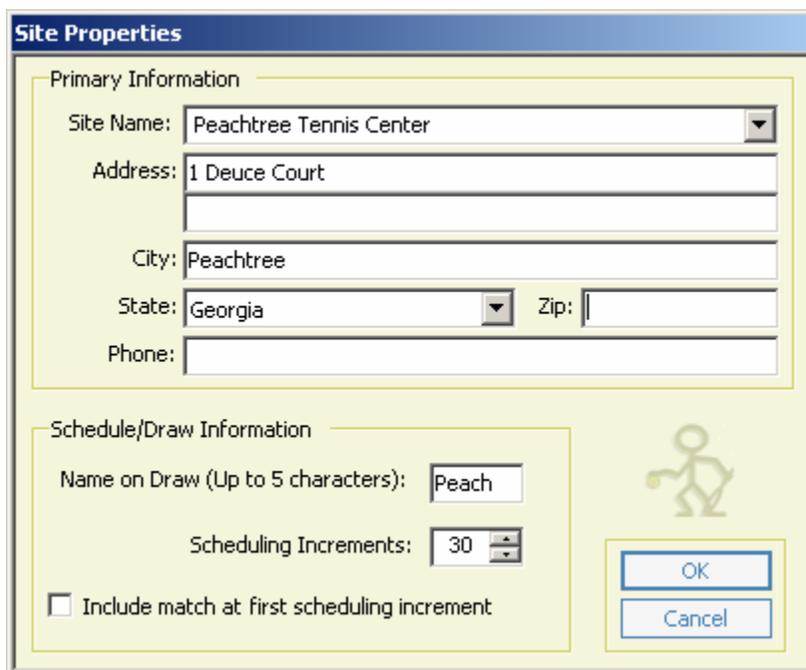

In addition, this area will allow you to specify the number of courts available for each site.

There are 2 different databases in the Site/courts area. The **tournament database** is the sites for this individual tournament.

The **master database** can be used to store information for all the sites that you continually use.

When you **add a site** to your master list, this site will be available to you each time you are in TDM. This will save time in adding sites to a particular tournament.

You only have to add the information once and then you can add it to as many tournaments as necessary. From the Master Site, click on 'Add Site' to access the Master site entry area.

The screenshot shows a dialog box titled "Site Properties" with two main sections: "Primary Information" and "Schedule/Draw Information".

Primary Information:

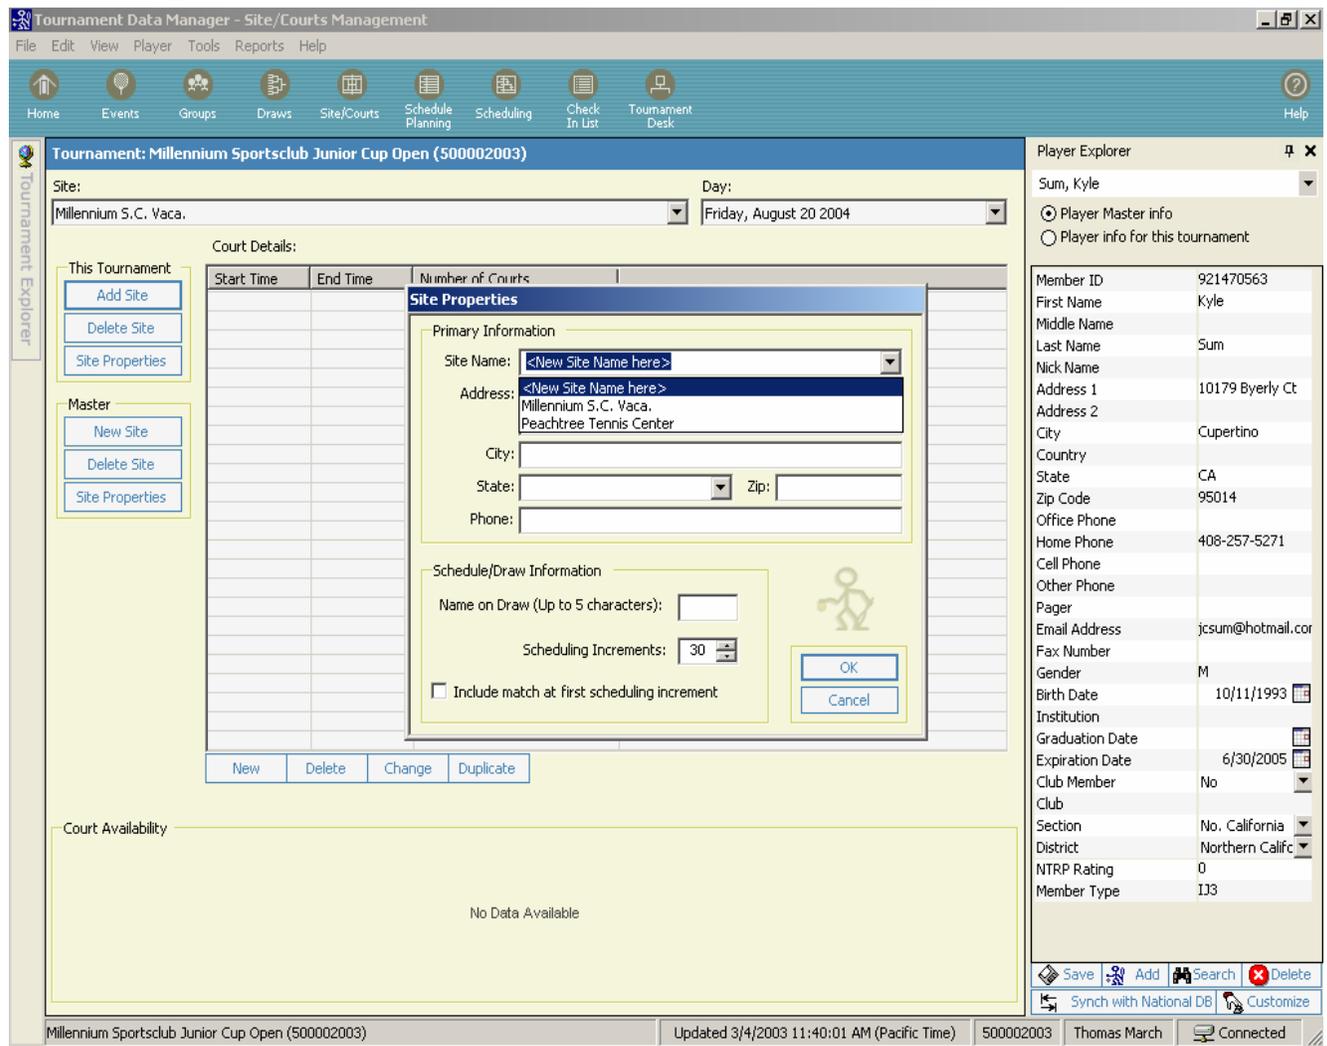

- Site Name: Peachtree Tennis Center (dropdown menu)
- Address: 1 Deuce Court (text field)
- City: Peachtree (text field)
- State: Georgia (dropdown menu)
- Zip: (empty text field)
- Phone: (empty text field)

Schedule/Draw Information:

- Name on Draw (Up to 5 characters): Peach (text field)
- Scheduling Increments: 30 (spin box)
- Include match at first scheduling increment

On the right side of the "Schedule/Draw Information" section, there is a stick figure icon representing a person with a tennis racket. Below the icon are two buttons: "OK" and "Cancel".

Now that the site is added to our Master database, you can add this site to your current tournament by clicking on **Add Site** from **This Tournament**.

You can only choose a site that has been created in the Master database. This prevents duplicates that can cause data problems later.

The recently added site, Peachtree Tennis Center, will be available in the drop down box to select.

All the information that you entered in the Master file will now show for this site.

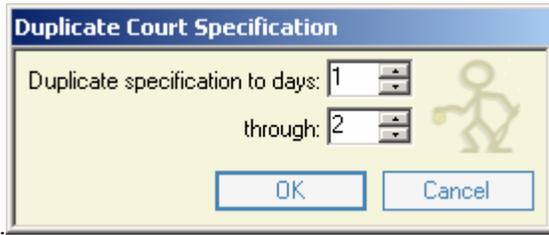

The site now shows in the Site drop down at the top. You will now be able to indicate the number of courts available for play at this facility.

To indicate the **number of courts** available for a specific tournament facility, choose the facility from the drop down of sites and then NEW at the bottom.

The **Court Specification** window opens and you can indicate a time range and the number of courts available. Once the time and courts are indicated, click on OK to save this information.

The court availability graph will then show at the bottom on the screen.

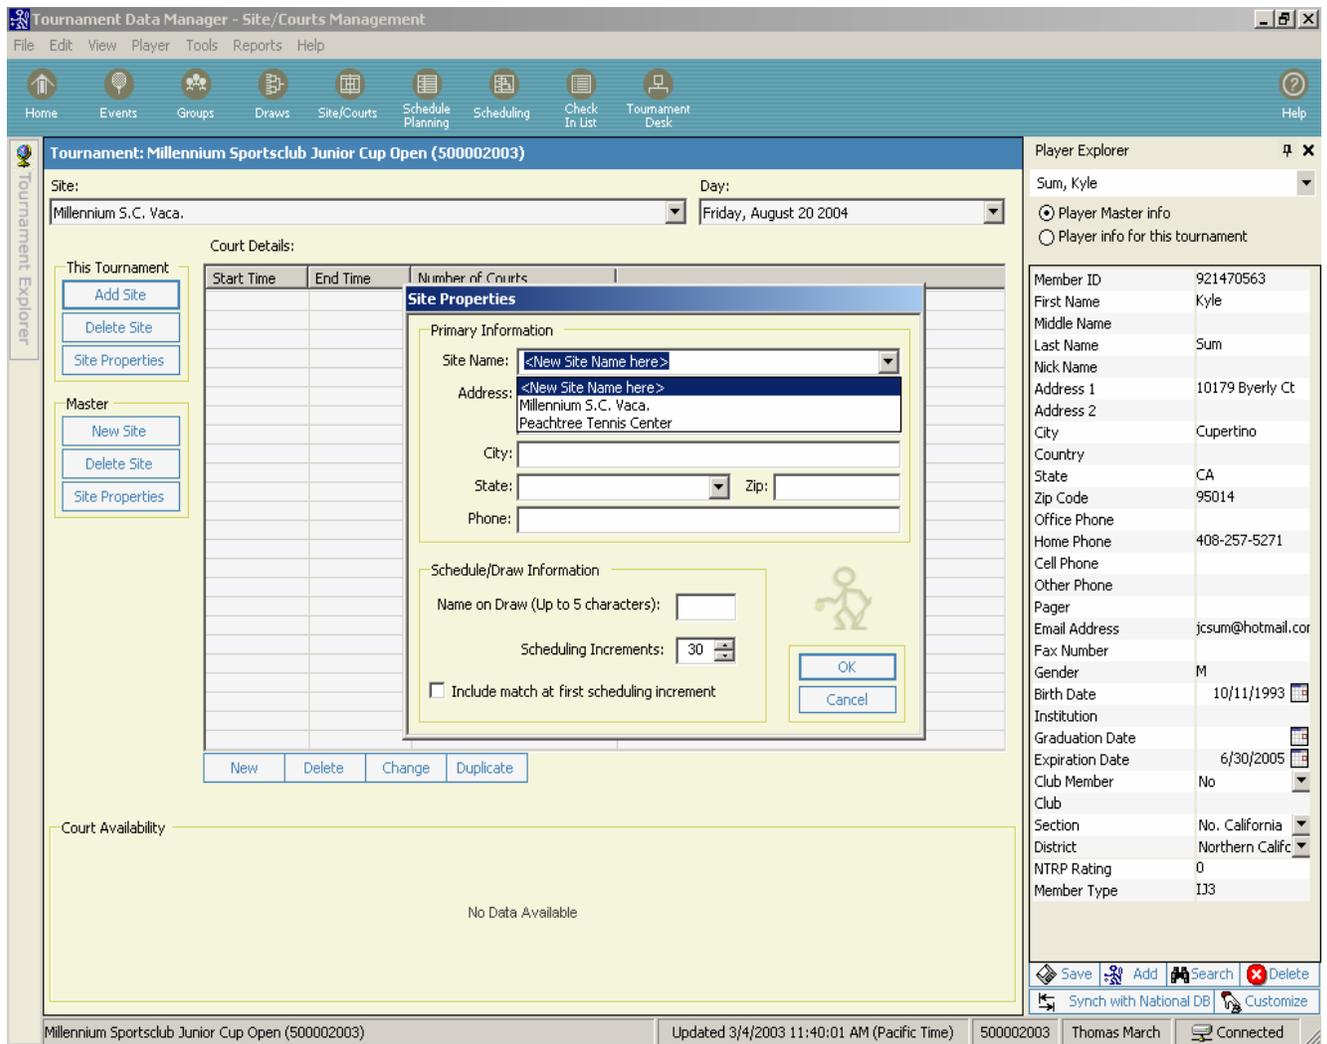

To indicate additional court availability at the same site, click on NEW at the bottom. TDM will default to the time that was last shown. The additional time and courts can now be added.

To copy this information for multiple days, simply click on **DUPLICATE** at the bottom. You can indicate the same court specs for all days. This process is repeated for each facility.

In addition, on the Site Properties screen, there is a way to indicate the site where a match is to be played on the draw sheet, by assigning each site a name to be displayed on the draw. Choose any unique indicator, up to 5 characters, for each site being used for this tournament.

Also define the Schedule Increments on the Site Properties screen for each site if using more than one. Accepting the default is the norm. If you choose to include a match at the first scheduling increment, put a check in the box shown below.

Step 3: Schedule Planning

Schedule Planning is comprised of 4 screens:

Capacity Planning

Event Planning

Capacity Planning

Capacity Planning contains graphs that show the available court hours as previously detailed under Sites/Courts

As events are planned at each facility, the **Planned Court Hours** indicator will increase, showing the court hours needed for those events.

Event Planning

The **Event Planning** screen shows the number of entrants for each division as well as the number of matches for each round. It is necessary for the draws to have been made in order for the events to be listed with the corresponding number of matches and rounds to be scheduled.

Event Planning							
Event	Players	Rd. 1	Rd. 2	Rd. 3	Rd. 4	Rd. 5	Rd. 6
Boys' 10 Singles Main Draw	24	0/8	0/8	0/4	0/2	0/2	
Boys' 10 Singles Consolation	24		0/8	0/4	0/2	0/1	
Boys' 12 Singles Main Draw	42	0/10	0/16	0/8	0/4	0/2	0/1
Boys' 12 Singles Consolation	42		0/10	0/8	0/4	0/2	0/1
Boys' 14 Singles Main Draw	59	0/27	0/16	0/8	0/4	0/2	0/1
Boys' 14 Singles Consolation	59	0/11	0/5	0/8	0/4	0/2	0/1
Boys' 16 Singles Main Draw	55	0/23	0/16	0/8	0/4	0/2	0/2
Boys' 16 Singles Consolation	55	0/7	0/9	0/8	0/4	0/2	0/1

Event Planning Detail

The **Event Planning Detail** screen is where you will indicate the facility where each round will be played.

Event Planning Detail			
> Boys' 10 Singles Main Draw - Round: 1			
Day Number	Schedule Date	Millennium S.C. Vaca.	Peachtree Tennis Center
1	08/20/2004	8	0
2	08/21/2004	0	0
3	08/22/2004	0	0

Planning Summary

The **Planning Summary** is a quick way to view the number of matches on a given day at each facility.

Planning Summary (Total matches planned per site)			
Tournament Date	Millennium ...	Peachtree...	
8/20/2004	0	0	
8/21/2004	0	0	
8/22/2004	0	0	

The first step is to **highlight the round** that you want to plan for scheduling under the event planning. Once you have highlighted the cell, move your cursor to the Event Planning Detail screen where you will enter how many of the selected matches you want to play at each facility on a particular day. Select the next round to be planned by clicking on it.

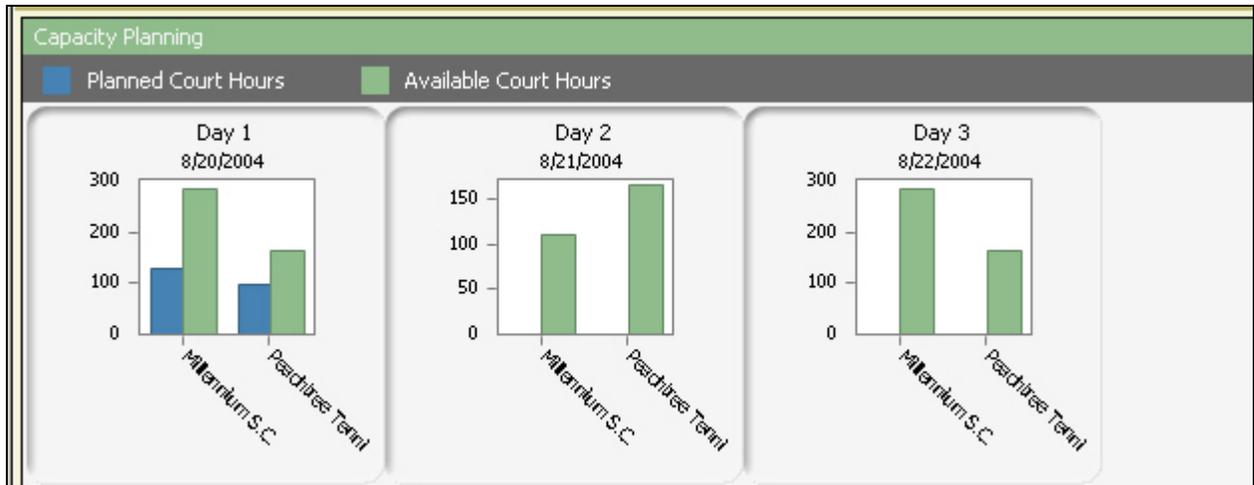

Event Planning								
Event	Players	Rd. 1	Rd. 2	Rd. 3	Rd. 4	Rd. 5	Rd. 6	
Boys' 10 Singles Main Draw	24	0/8	0/8	0/4	0/2	0/2		
Boys' 10 Singles Consolation	24		0/8	0/4	0/2	0/1		
Boys' 12 Singles Main Draw	42	0/10	0/16	0/8	0/4	0/2	0/1	
Boys' 12 Singles Consolation	42		0/10	0/8	0/4	0/2	0/1	
Boys' 14 Singles Main Draw	59	0/27	0/16	0/8	0/4	0/2	0/1	
Boys' 14 Singles Consolation	59	0/11	0/5	0/8	0/4	0/2	0/1	

TDM will allow you to **split the round** at two different sites.

** For a local tournament that was not downloaded from the Online Sanction form, the divisions may not have been specified. Be sure to include a division name for all events. Otherwise, under the event planning screen, there will not be any events listed. To fix this problem, should it arise, go back to Events, then edit event and choose the most appropriate one. If none of the divisions fit your criteria, use the Open divisions for best results.

Planned Court Hours

The **Planned Court Hours** bar graphs are now visible and show the court hours that have been used.

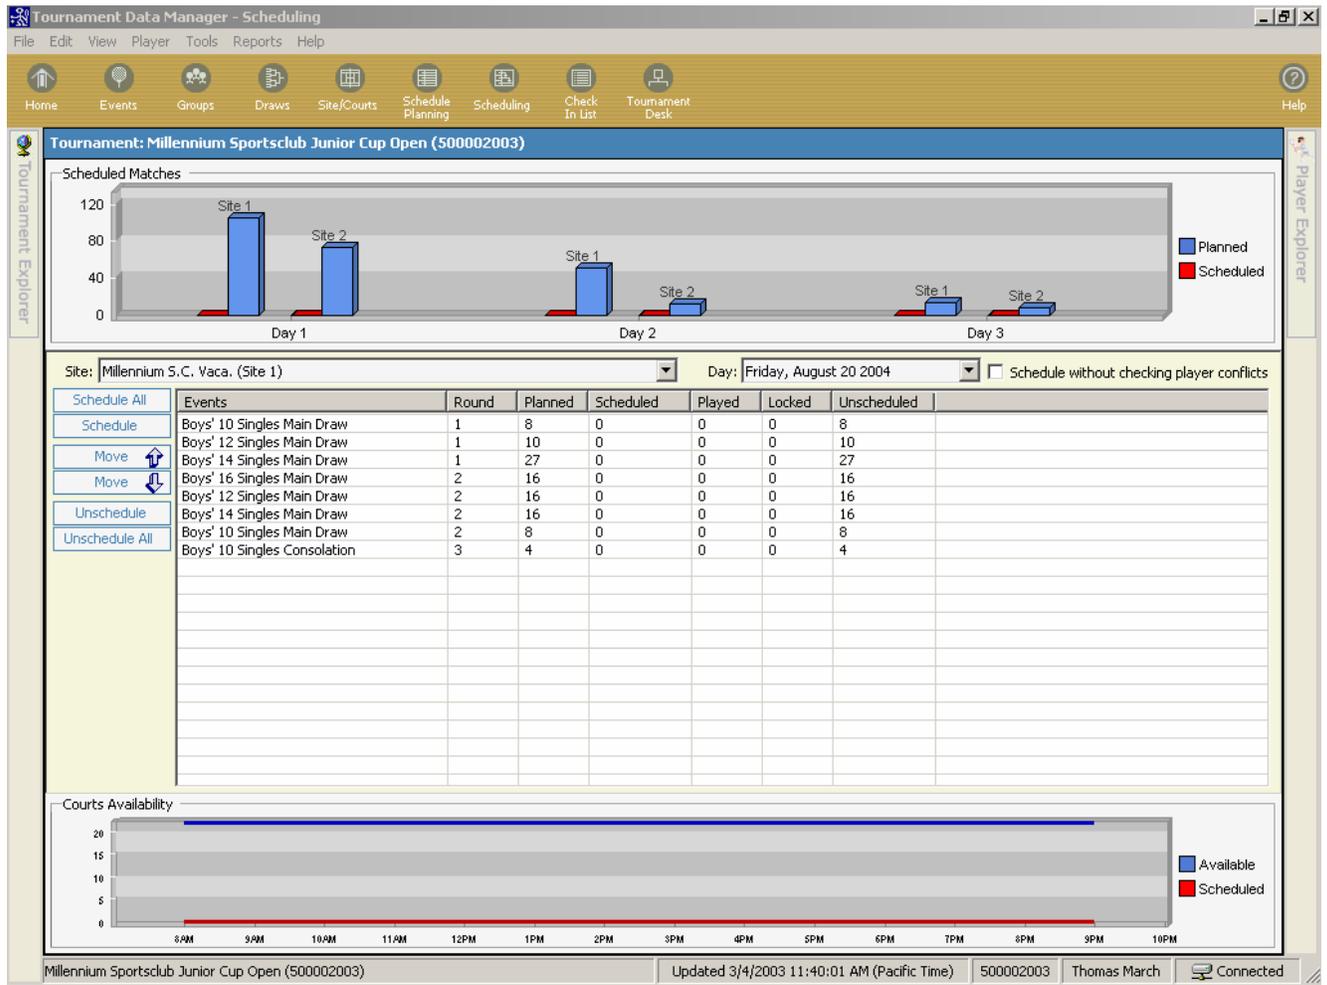

You can continue planning the event locations in this way until all rounds have been indicated.

By monitoring the Planned Court Hours graphs, you will know how many more rounds you can schedule at a particular facility for a given day.

The bar graphs now indicate two days of planning.

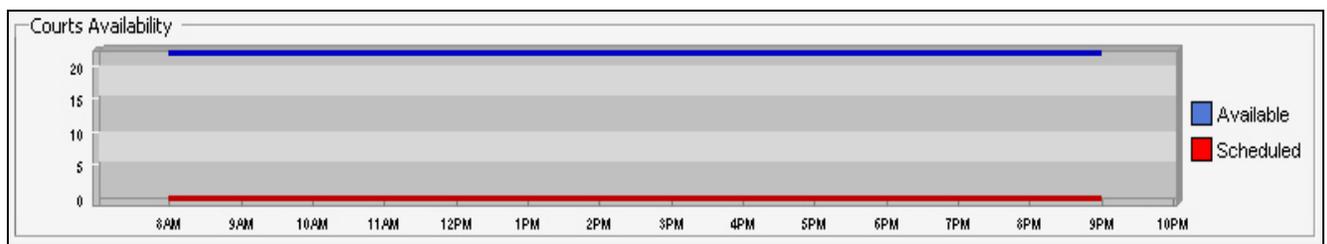

Step 4: Scheduling

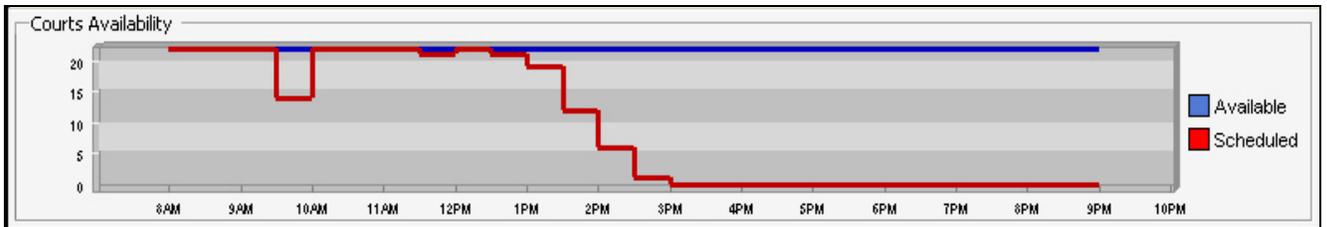

The **Scheduling** screen is where the actual scheduling of the events takes place.

The top graph shows the matches that are scheduled at each Site for each Day of the tournament. The blue bar shows the **Planned matches** and the Red indicates the **Scheduled matches**. These two bars should be equal once all matches have been scheduled.

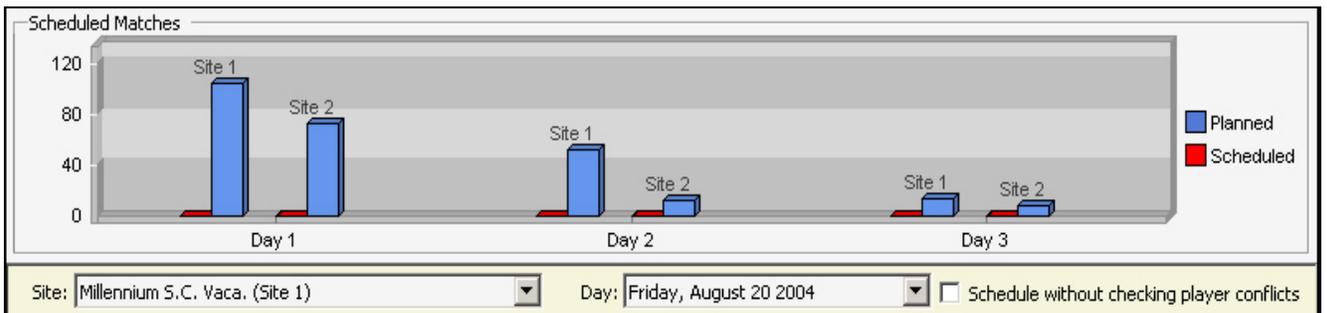

The **Courts Availability Graph** shows in a blue line the number of courts that are open for play (as indicated in Sites/Courts) at a particular facility as selected from the drop-down box on a specific day.

As you schedule the matches, the red graph will indicate how many of these courts have been used.

You must indicate the site and day that you want to schedule. You have the option to 'Schedule All'.

To **schedule a single event** at this facility, highlight the event and click on SCHEDULE.

Schedule

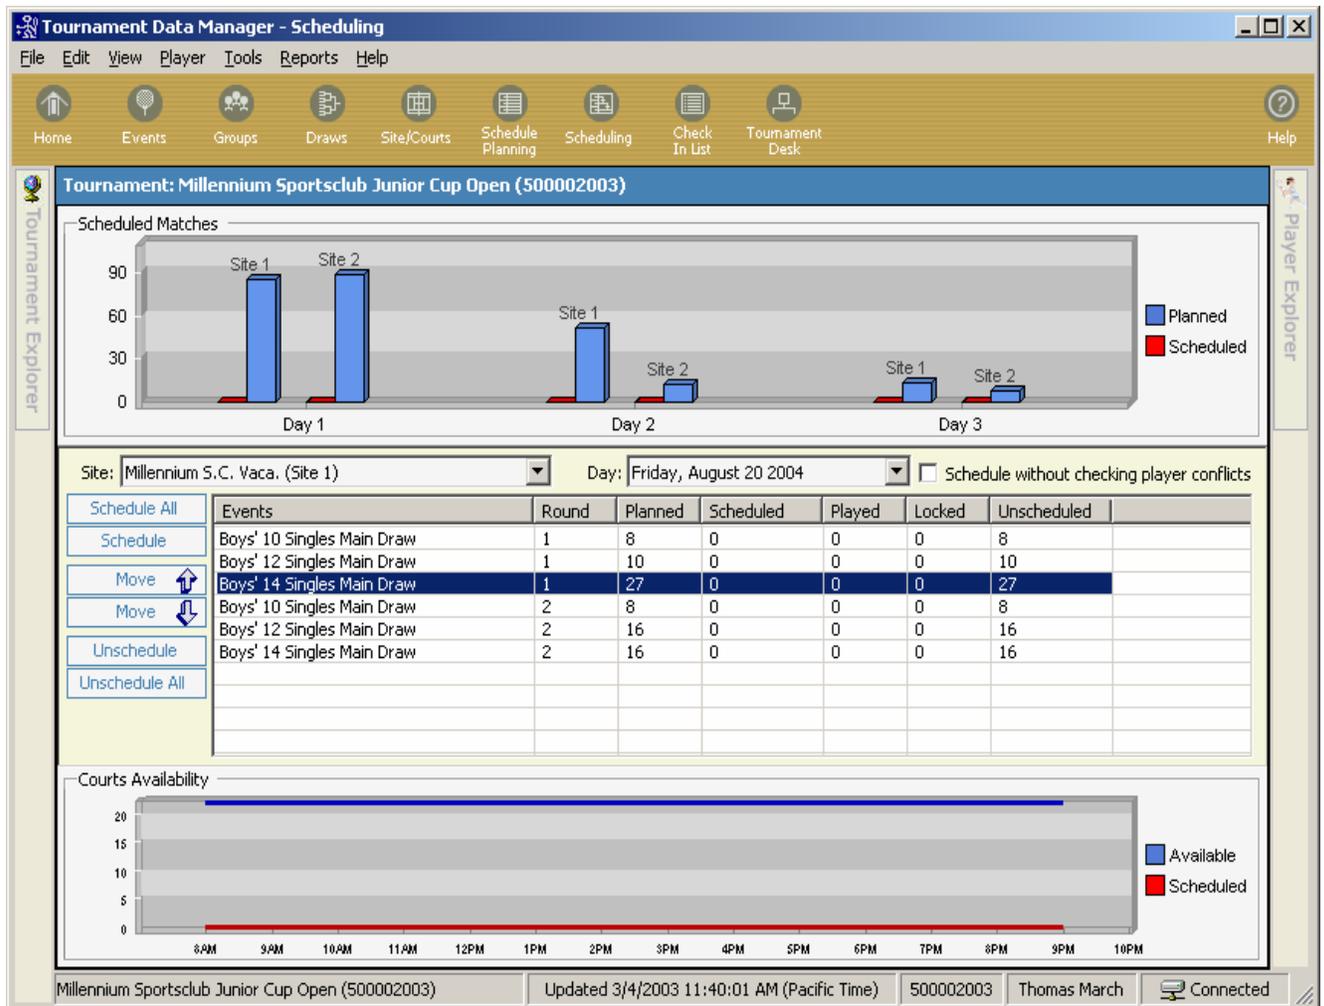

Schedule At or After: 8:00 AM

OK CANCEL

You will be allowed to indicate the start time for this individual division, such as Boys 10 Singles Main Draw.

You can indicate a time to **Schedule At or AFTER**.

Defining the order in which events are to be scheduled.

You can **move the events 'up' or 'down'**, so a particular event is scheduled ahead of another event. Be sure to put the events in a logical order. For instance, if your order for round 1 is Boys 10, Boys 12, then Boys 16 for a particular day, when you get to round two for the same day, keep this order. This allows the maximum usage of court time. When you change to a different day, you can start with a new order of play.

You can **Unschedule** a selected event or **Unschedule All** events. Keep in mind that all these options are only for THIS site on THIS date. Any matches that are marked as **locked** on the draw sheet under Match Schedule will not be unscheduled.

The system automatically creates a schedule with match times and we can then return to the draw to view the match times that are now displayed there.

You can **Schedule ALL matches** at one time.
 All rounds for this facility for Friday have been scheduled.

You can create reports that show schedule and match information.

Step 5: Manual Scheduling

You also have the ability to **manually schedule** or enter **match results** from the draw screen. To do either function, left click between the players' lines of the match that you need to edit.

The screenshot shows a software window titled "Match Properties" with a sub-tab "Match Schedule". On the left side, there are four buttons: "Match Results", "Match Schedule" (which is highlighted), "Potential Match Conflicts", and "Court Availability". The main area of the window is divided into two sections. The top section shows a match between "Collin, Drew" and "Guinard, Javier" with a horizontal line between them. The bottom section is titled "Match Schedule" and contains the following controls: a checkbox for "Schedule Locked" (unchecked), a dropdown menu for "Site:" showing "Millennium S.C. Vaca.", a spinner for "Day of Tournament:" set to "0", a text field for "Match Time:" set to "8:00 AM", and a "Suggest Time" button with a checkmark. At the bottom right of the window are "OK" and "Cancel" buttons.

The **Match properties** box will open. If the match has not been scheduled, it will default to **Match Schedule** as generally you will indicate the match time before you can enter the results. You can indicate the Location, Day of tournament (the date will automatically change to correspond) and the Match Time.

If you check the **Schedule Locked** box, this will prevent TDM from scheduling this individual match if you use the auto-schedule feature.

The **Suggest Time** feature will show you the first available court time on a particular day of the tournament at the selected site.

Once you have entered the Day, Site and time of the match, click OK and the information will show on the draw. Remember, you can select what information should show on the draw by going to draw properties.

To have TDM **default to a particular day and/or site, go to the Scheduling screen and change the drop downs on that screen to the day and/or site that you will be working on. When you need to change one or the other, return to Scheduling screen and change the information.
